Vision Statement Survey

As the strategic planning process comes close to being completed, the Strategic Planning Committee would like to hear from you about what you feel the vision of the Union should be. A vision statement sets out the mission and core values of a union and we would like your help making our vision something that resonates with all our members. We have, of course, gleaned information about what you would like our vision to be from thousands of written responses to the surveys but wanted to put the following terms to the members.
