- Participate fully with TechnipFMC competency scheme
- To communicate with OOS management on personnel and operational issues
- Attend morning and management meetings as required
- Ensure toolbox talks take place and are documented
- To ensure trainees are properly trained and mentored
- To ensure appropriate training and personal and career development needs are met for the personnel in their team
- Speciality Requirements – Diving
- A Supervisor Technician, either electrical or mechanical, has reporting and functional responsibilities to the Vessel Chief Engineer. In addition, during diving operations, he has a direct operational reporting line to the Diving Supervisor and the Offshore Construction Manager
- The Supervisor Technician shall not have maintenance carried out, or take off line operational

equipment, either directly or indirectly related to the work in hand, without the approval of the on-shift Diving Supervisor, or where appropriate the Life Support Supervisor

- The Supervisor Technician shall assist in the preparation, control and monitoring the dive system budget
Speciality Requirements – Plough
- During ploughing operations, the Supervisor Technician may be required to pilot the plough
Speciality Requirements - Hyperbaric Welding
- The Supervisor Technician working on hyperbaric welding spreads will be reporting to the Habitat Welding Supervisor and shall be responsible for the electro-mechanical operations of habitat, pipe handling frames and all directly associated pipe welding equipment, e.g. Roberts cutters, electro/hydraulic power, door seals, heater, preheat, Regen, equipment and hand power tools, emergency breathing apparatus, hyperbaric welding bladders etc.

Competency (Staff Level 3)

Drive for Results

- The ability to constantly achieve results within defined timeframes. The drive to do things better and complete against a standard of excellence

Customer Focus

- Understands and meets the needs of customers – internal and external as appropriate

Continuous Improvement

- Continuously strives to improve the performance of self and others, and uses innovative methods to achieve this

Personal Effectiveness

- Has the capacity to change and improve and displays high levels of personal credibility and integrity

Strategic Awareness

- Has an awareness of the organisation's strengths in the market and competitive position in the market place? Takes an active part in communicating and acting on local objectives and strategies

Team Working

- The ability and determination to build and maintain an excellent working relationship based on a demonstrated respect for others and a willingness to work co-operatively

Personal Qualities

- Good organisational skills
- Ability to command respect from subordinates
- Good communications skills
- Good technical acumen
- Problem solving ability
- Good spoken/written English
- Ability to work under pressure

Leadership Behaviours

- Role model – setting an example
- Sound judgment which is thoughtful and action oriented
- Accountability, transparency and trust

- Understanding personnel and their needs
- Collaborating effectively to deliver results
- Planning and organising what has to be implemented
- Communicating what's to be achieved, and why
- Preparedness to take tough decisions
- Identifying priorities and remaining focused on outcomes
- Motivating others and acknowledging achievement
- Empowering and supporting others to build capability
- Showing loyalty and keeping commitments

Main accountabilities:

N/A

Qualifications (professional, technical, academic):

Essential:

- Appropriate electrical or mechanical trade qualification (City & Guilds Level 3, NVQ Level 3, SVQ Level 3 or Equivalent)

Preferred:

- Valid offshore safety/survival course
- Valid offshore medical certificate

Typical background and experience required:

Essential:

- Extensive Offshore experience in related field

Nice to have:

- Proven man management skills
- Management training
- Safety leadership training
- ORCA training
